

Welcome to Sheep Translation Studio.

A sheep finds a word.

Another sheep finds a similar word.

The sheep compare the words and choose the best one.

A sheep spins wool.

Another sheep sells wool.

The sheep share their stories with the world.

One sheep writes a story about wool.

Another sheep writes a story about sheep.

The stories are different, but some words are the same.

Last week, we translated a story about sheep.

This week, we translated a story about wool.

Next week, we will translate another story.

Translation memory remembers old translations.

Translation memory remembers useful translations.

Terminology helps every sheep use the same words.

Together, the sheep work carefully.

Together, the sheep learn new words.

Together, they make translation easier.
